Application Details

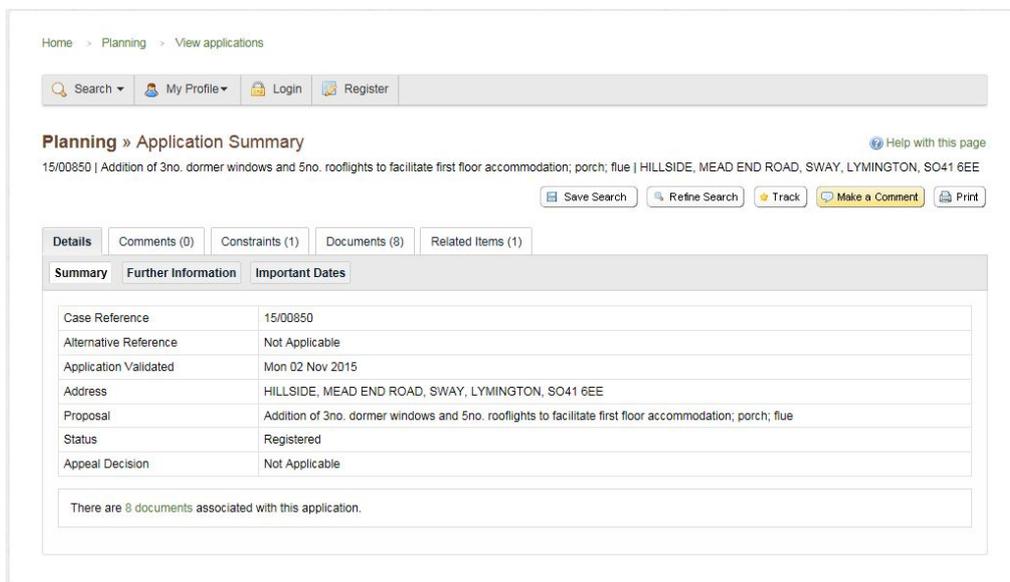

Once you have selected an application from your search results the application's details will be displayed.

The application details are displayed at the top of the page, with further tabs below containing all of the relevant information about the application.

Details

1. Click on the **Details** tab to display the full details relating to the application.

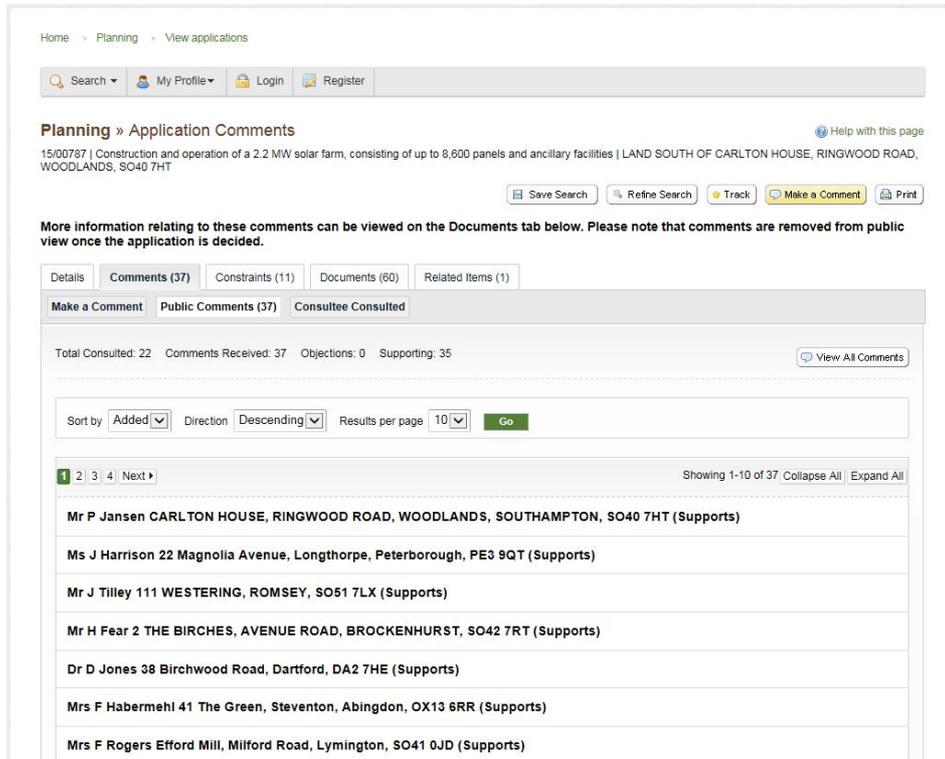

2. The Application Details are split up into three tabbed sections. Click on the appropriate tab to display those details:

- **Summary** – displays the basic information pertaining to the application. The summary also identifies the number of the **documents**, **cases**, **comments** and **properties** that have been added to this application. Click on one of these to view them.

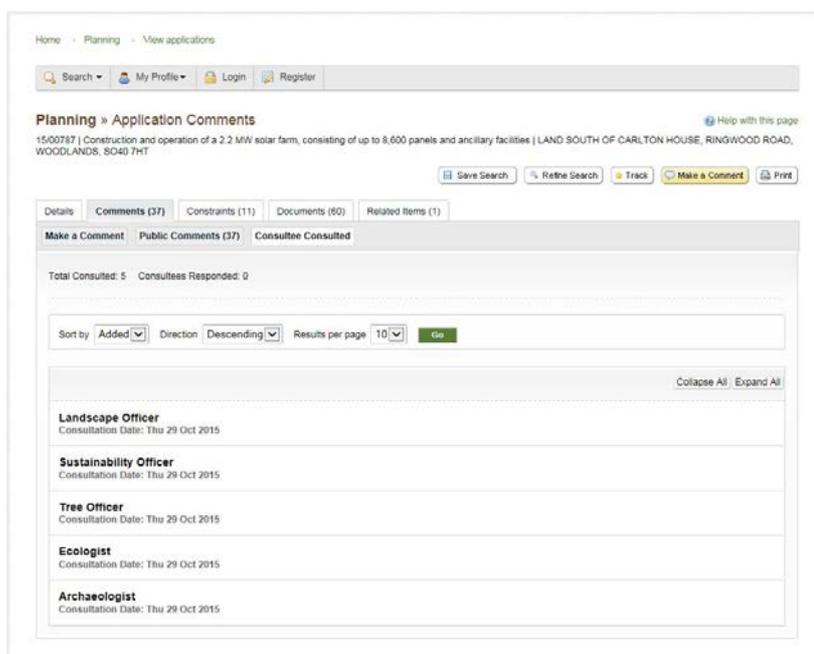

- **Further Information** – displays additional information about the application that was not included in the summary.
- **Important Dates** – displays the dates on which important events in the lifespan of the application occur from initial submission through to the decision.

Comments

1. Click on the **Comments** tab to display comments that have been made about this application.

2. Comments can either be submitted by members of the public or by people who have been consulted about the application. Click on **Public Comments** or **Consultee Consulted** as appropriate.
3. The **Public Comments** screen shows everyone who has commented and their stance. The **Consultee Consulted** screen shows all the consultees who have been consulted, but they may not comment on the application.

4. At the top of the **Public Comments** screen there are four headings:

- Total Consulted – Shows the number of near neighbours notified of the application.
- Comments Received – Shows the total number of people who have commented. (If a person has more than one comment, they will only appear once on this list).
- Objections – Shows the number of people that are objecting the application.
- Supporting – Shows the number of people that are supporting the application.

The totals for the Objections and Supporting might not add up to the number of Comments Received. This is because some of the comments are neutral (the difference between the **Comments Received** number and total number of **Objections** and **Supporting** is the number of neutral comments received).

5. You can re-order the list by the date the comment was added or by the commenter's name. Select one of these from the **Sort by** drop down list, then click on **Go**.
6. To change the direction of the list select Ascending or Descending from the **Direction** drop down list, followed by **Go**.
7. To change the number of results displayed, select from the **Results per page** drop down list, followed by **Go**.
8. If there are more results than fit on one page, navigate to further pages by clicking on **Next** or by clicking on the **Page Number** directly.
9. Comments are displayed showing the name of the commenter, their address and their stance on the application (objects, supports or neutral).
10. The **View All Comments** button will take you to the documents screen, but no documents will be visible.
