## New Forest Consultative Panel 07 March 2019

# SSD River & Coastal Maintenance Programme & Engagement

Adam Hammerton

## Our aims

## Improve transparency

- How/why we make decisions and
- to manage expectations about work we do and do not perform

### Seek Opportunities

- To involve others in identifying where there might be opportunities for a *more coordinated approach* which would improve efficiency or cost-effectiveness
- Provide you the opportunity to comment on and influence the maintenance programme and to deliver a more catchment based approach to managing our rivers and coasts

## **Our Maintenance Programme**

To reduce flood risk, we have programmes of works for:

## Frequent Maintenance

- Grass & Weed Cutting
- Operational Checks & Servicing
- Debris removal and clearing

## Intermittent Maintenance

- Refurbing & replacing sluices and flaps
- Embankment repairs

## Asset Inspections

• Cracks in embankments, blocked outfalls & broken Sluices etc.

# Programming of works (1)

We plan and prioritise our maintenance works around:

- Where flood risk is greatest
- Ops Teams resources
- Environmental constraints
- The Seasons and weather

Funding

- Asset data and programmes all held on our Asset management system (AIMS).
- Our Maintenance Standards dictate how much money we get from Government (FDGiA).

# Programming of works (2)

Certain works can NOT be undertaken when:

- Reptiles are active
- Over-wintering birds are present, or there a
- There are ground nesting birds
- Fish are spawning
- During high flow periods
- Ground is too wet

- Drought conditions
- Before grass and weeds have had a chance to grow
- there are Water Voles
- Near Hibernaculum and other protected habitats

#### Improving transparency

Improving transparency

# Why things slip

There are many reasons why a programme slips and maintenance activities are not carried out or postponed:

- Bad weather & our Incident response duties
- We miss our window of opportunity
- Environmental restrictions
- Permission from land-owners

We have to prioritise where we put our resources!

## Reasons why we don't maintain

Where we could be breaching Treasury Rules

- No FCRM risk
- Uneconomical to maintain/replace

Historical reasons as to why the EA has maintained assets...

• We are proactively looking to apply out Maintenance Protocol.

#### Seeking Opportunities

## Why seek opportunities?

Co-ordinating planning and delivery of programmes

- ensuring following long term strategic direction
- realising multiple benefits (NFM)

### Improve efficiency or cost-effectiveness

- Who's best to deliver (PSCA)
- Identifying beneficiaries and making the right person take on their responsibilities

#### Seeking Opportunities

## Why seek opportunities?

Co-ordinating planning and delivery of programmes

- ensuring following long term strategic direction
- realising multiple benefits (NFM)

### Improve efficiency or cost-effectiveness

## **Our aims**

## Improve transparency

- How & why we Programme and Prioritise our maintenance works
- What work we do and don't and when

### Seek Opportunities

- Looking to create a more coordinated approach
- To improve efficiency or cost-effectiveness
- How to feed your comments and suggestions to us here in the EA.
