T 8	Prune 1 x Oak tree Prune 1 x Beech tree	Maintenance work is proposed to improve safety where trees have grown to overhang the property. The Beech tree has a tri-furcated base liable to water retention and rot. It is anticipated that shortening limbs overhanging property and thinning will reduce the load on the base and help ensure the tree's long-term health.

Date Registered: 12/09/2022

Address: MILL COTTAGE, MILL LANE, BURLEY, RINGWOOD, BH24 4HR

Case Officer: James Palmer

Tree Ref: **Proposed Works:**
Prune 1 x Oak tree

Reason for Work:

From Case CONS/22/0030 - "Oak - The roots of tree and trunk are in, and growing from lower bank of stream at water level and subjected to under cutting . The trunk is leaning S/SE towards the house with the main branches also going in this direction. (see attached photographs). The upper branches are therefore within 1m of the house. The tree would cause major damage to the house if it falls"

It is intended to take the height down so that if it did fail it would safely clear the property. Pruning will also relieve some weight off the leaning tree.
