

approved in writing by, the Local Planning Authority. Such mitigation package shall address all of the additional nutrient load imposed on protected European Sites by the development when fully occupied and shall allow the Local Planning Authority to ascertain on the basis of the best available scientific evidence that such additional nutrient loading will not have an adverse effect on the integrity of the protected European Sites, having regard to the conservation objectives for those sites; and

c) All measures forming part of that mitigation package have been provided to the Local Planning Authority.

The development shall be carried out in accordance with and subject to the above details.

Reason: There is existing evidence of high levels of nitrogen and phosphorus in the water environment with evidence of eutrophication at some European designated nature conservation sites in the Solent catchment. To ensure that the proposal may proceed as sustainable development, there is a duty upon the Local Planning Authority to ensure that sufficient mitigation is provided against any impacts which might arise upon the designated sites. In coming to this decision, the Authority has had regard to Regulation 63 of the Conservation of Habitats and Species Regulations 2017 and Policy DP8 of the New Forest National Park Local Plan 2016-2016 (August 2019).
